

Innovation that cuts through.

SAWTEQ S-300/400

Edition 60: Traditionally ahead of its time.

60 Years
EDITION

LIMITED TO 60 MACHINES

Innovation that cuts through

Since 1966, our panel saws have been setting the standards for precision, reliability, and pioneering technology. To mark this anniversary, we are presenting a special edition panel saw, **limited to just 60 machines**, that not only reflects on the our history of excellence, but also pushes it into the future. Equipped with features that highlight what is possible today – and what will be standard tomorrow – this saw sets the next standard of performance.

More information:

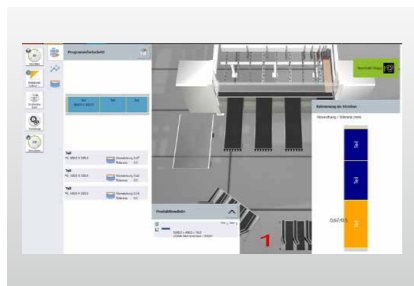

This special edition machine combines our six decades of experience with the latest state-of-the-art technology that makes every step more efficient, safer, and more intuitive.

The following features are included:

- Spring-preloaded wheels
- Pressure beam height control
- Labeling system
- intelliGuide Classic
- dustEx

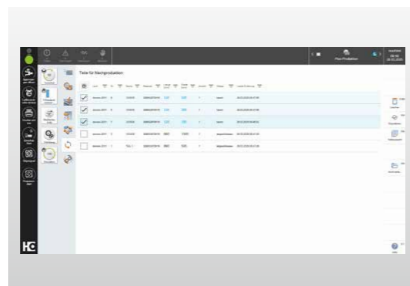

The Edition 60 machine can be flexibly adapted to your requirements with additional options.

Additional included features:

toleranceCheck

The innovative toleranceCheck continuously ensures the individually required dimensional and angular accuracy of parts – even with stress-affected material.

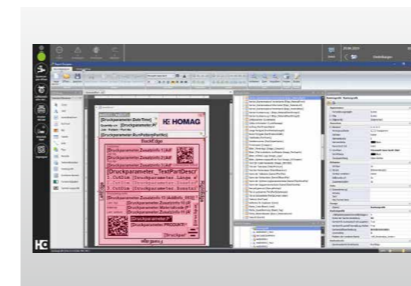

Part reproduction

The CADmatic re-production option collects parts that need to be reproduced, transfers them to optimization, and generates new cutting plans. This allows parts to be reproduced quickly, easily, and reliably and cleanly fed back into the overall process.

Manual offcuts management

The manual offcuts management organizes manual offcuts directly at the saw, prevents unnecessary leftover stock, and improves material utilization. Offcuts sections are clearly displayed, required offcuts are reported and recorded at an early stage.

Labeling with part graphics

Whether individual components or entire stacks – mark your work results with all important information and pass on data for subsequent machines

1 year of intelliDivide*

The easy way to achieve first-class optimization results Upload your parts list online, and you're done. The result? Cutting plans and entire runs in multiple variants – for you to choose from. That's how easy intelliDivide works. Try our optimization for 1 year.

* Only available in tapio countries.

Warranty extension to two years, including wear parts package

Greater security, predictable costs, and long-term investment security – any breakdowns or faults are reliably covered.
